

# AURJEI STEVEN CARREON

Cavite, PH | Phone: +63 9764937713 | aurjei.steven.carreon@gmail.com | GitHub: github.com/Jeeei88888

## EDUCATION

### ADAMSON UNIVERSITY

#### Bachelor of Science in Information Technology

July 2025

Specializing in Network/Cloud

Relevant Coursework: Cloud Computing & AWS Fundamentals, Networking & Cloud Security, Cloud Architecture & Deployment

## EXPERIENCE

### DevOps Engineer | GECO Asia

March 2026 - Present

- Deployed on-site with EssilorLuxottica's DevOps team; implement and maintain observability and GitOps tooling (EFK, Prometheus, Grafana, Argo CD) for monitoring, logging, and continuous deployment across PROD, DR, QUA, and PP environments
- Designed and shipped an AI-driven first-layer alert triage that wires Prometheus/Alertmanager to an in-cluster HolmesGPT engine, automatically investigating critical alerts and emailing root-cause analysis before on-call engineers open a terminal, keeping cluster data in-house
- Support developers through application deployments and issue troubleshooting across INT, Staging, UAT, and PROD environments
- Perform AKS node pool migrations and Kubernetes version upgrades, handling scaling operations and application configuration updates

### DevOps Apprentice | EssilorLuxottica

September 2025 - March 2026

- Assisted with AKS node pool migrations (Standard Es v3 -> Standard Eads v5) across PROD, DR, QUA, and PP environments, handling deployment updates, scaling operations, and application configurations
- Supported Kubernetes upgrades from v1.33.x to v1.34.x
- Migrated enterprise tenant from CoreMedia v10 to v12, rebuilding repositories, databases, user initialization, infrastructure, and operational configurations
- Deployed and managed Nginx Proxy Manager and Portainer for traffic routing and container administration
- Assisted with SSL/TLS certificate management across INT, Staging, UAT, and PROD environments
- Diagnosed and resolved platform issues including memory heap constraints, disk utilization, and application errors using centralized logging and metrics

### Backend DevOps Trainee | Hivelabs Technologies Corp.

May 2025 - July 2025

- Actively involved in full-stack development for an eCommerce application.
- Assisted in frontend development tasks including UI fixes and layout enhancements using Flexbox.
- Worked on third-party payment integration with FiUU APIs.
- Utilized JIRA for task tracking, sprint planning, and ticket management as part of the Agile development process.

### QA Tester Intern | Hivelabs Technologies Corp.

February 2025 - April 2025

- Conducted manual testing for an ERP system to ensure functionality and reliability.
- Designed comprehensive test scenarios and detailed test cases based on system requirements.
- Identified and documented bugs using Trello and Excel for efficient tracking and resolution.

## RELEVANT PROJECTS

### Patient Monitoring System with QR Code Integration - Deployed on AWS using Terraform

- Designed and deployed a patient monitoring system that leverages QR code technology for quick and accurate access to patient records.
- Provisioned a two-tier architecture in AWS using Terraform, separating application and database layers for scalability and maintainability.
- Automated infrastructure deployment, including EC2 instances, RDS, and VPC networking, ensuring a reliable and cost-effective cloud environment.
- Implemented application delivery using GitOps, making it easy to deploy and manage microservices with minimal manual effort.

## TECHNICAL SKILLS

**Languages** PHP, Python, Bash

**Database** MySQL

**AWS** EC2, S3, CloudFront, IAM, VPC, Route 53, Lambda, CloudFormation, API Gateway

**Tools** Git, Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, Argo CD, Prometheus, Grafana

**OS** Linux Ubuntu

## CERTIFICATION

AWS: AWS Solutions Architect - Associate    MySQL: IT Specialist - Databases
